

Motivation

Goal: High quality object boundaries from bounding box annotations.

Full supervision
Significant annotation effort is required.

Training data

Boundary detection

Weak supervision
Bounding box annotation requires 2 clicks per object.

Framework

Boundary detection tasks:

Generic boundaries Object-specific boundaries Class-specific object boundaries

BSDS [Martin et al., ICCV'01] **VOC** [Everingham et al., IJCV'15] **COCO** [Lin et al., ECCV'14] **SBD** [Hariharan et al., ICCV'11]

Levels of supervision:

Fully unsupervised Detection annotations Detection and generic boundary annotations

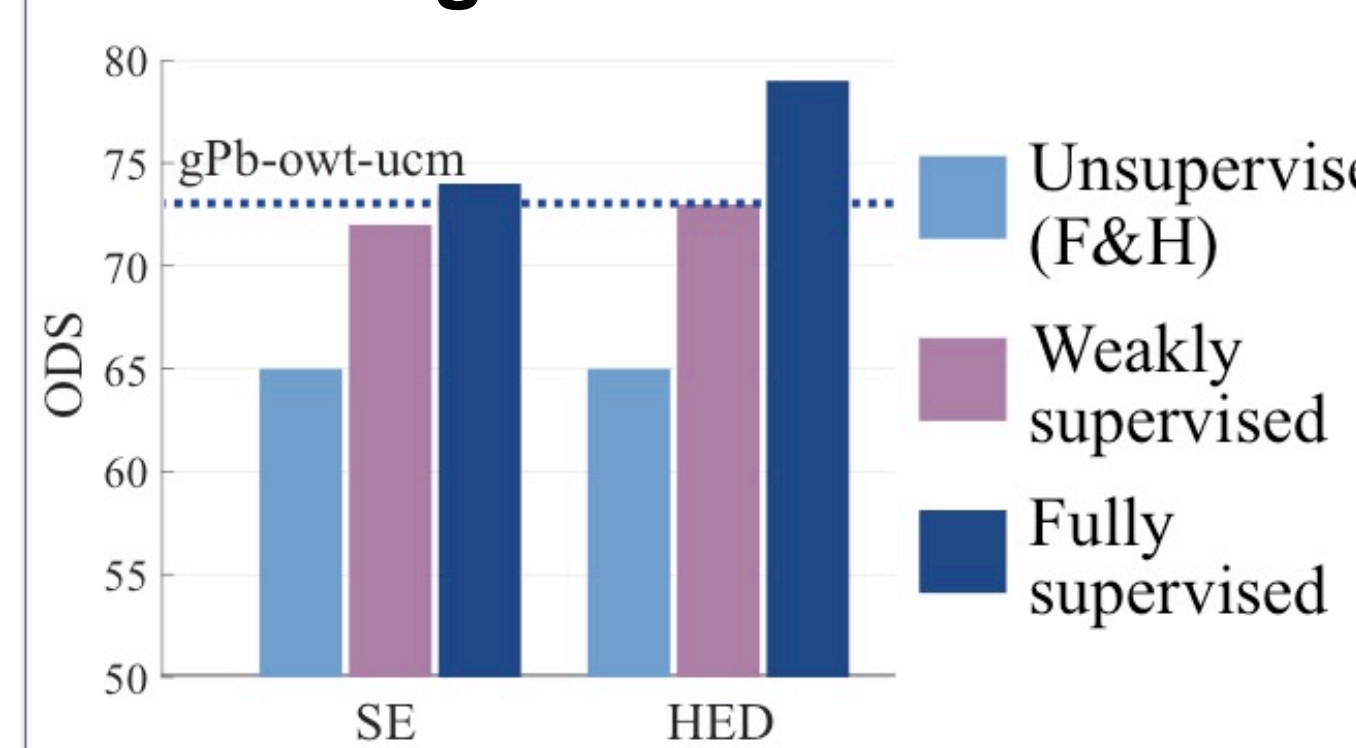

Baselines:

- SE: Structured Edge Forests [Dollar et al., PAMI'15]
- HED: Holistically-nested Edge Detection [Xie & Tu, ICCV'15]

Weakly Supervised Object Boundaries

Robustness to Annotation Noise

BSDS: generic boundaries

SE and HED are robust to annotation noise during training.

Weakly Supervised Boundary Annotations

Approach: Generate weakly supervised annotations to train boundary detector.

Combination of sources:

Ground truth

Detection bounding boxes [BBs, Fast-RCNN, Girshick, ICCV'15] Graph-based segmentation [F&H, Felzenszwalb et al., IJCV'04] Box driven segmentations [GrabCut, Rother et al., SIGGRAPH'04] Object proposals [SeSe, Uijlings et al., IJCV'13], [MCG, Pont-Tuset et al., arXiv'15]

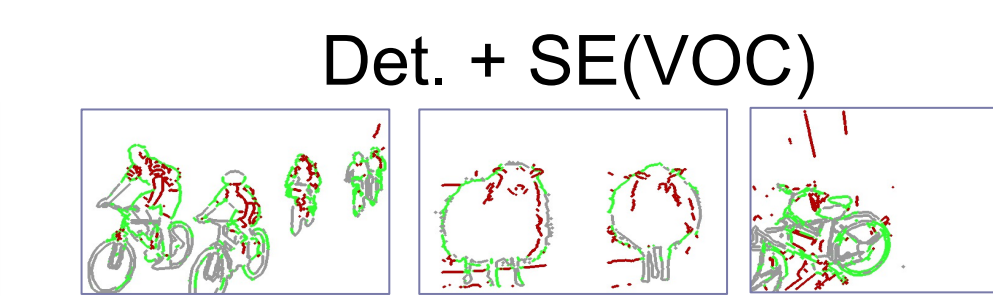

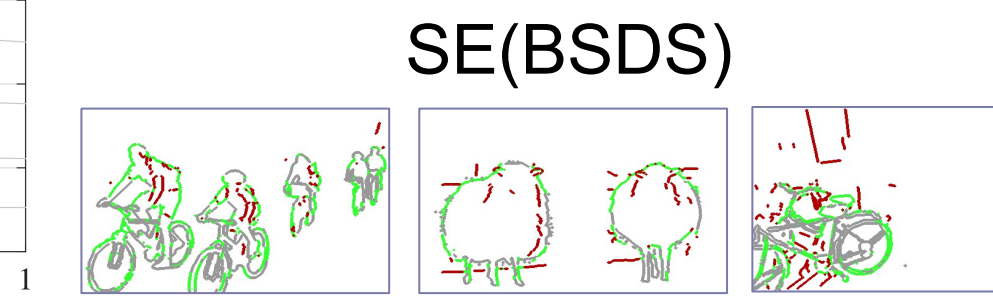

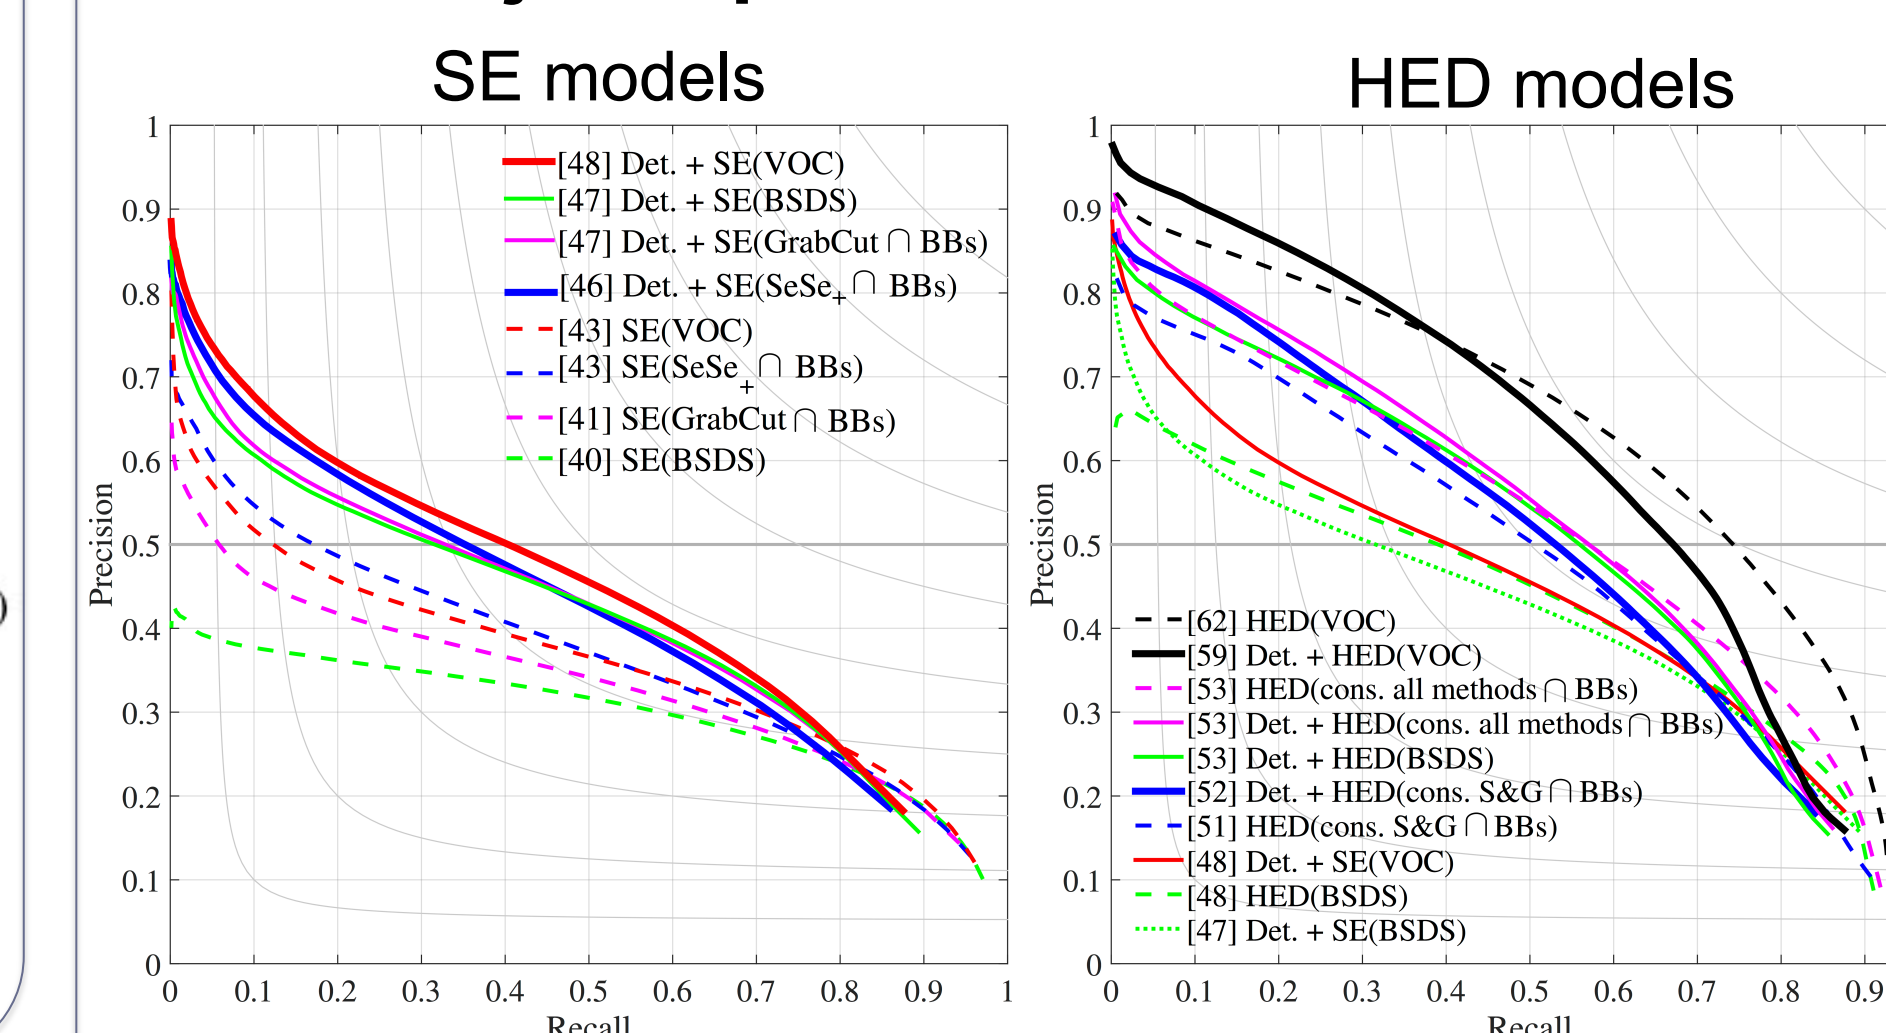

Generated annotations:

F&H \wedge BBs SeSe \wedge BBs SE(SeSe \wedge BBs) consensus S&G \wedge BBs consensus all methods \wedge BBs

Positive boundaries Ignore boundaries Ignore region Negative boundaries

Experimental Results

VOC: object-specific boundaries

Detection boxes at test time to improve boundaries

SE(weak) Objectness map Det. + SE(weak)

Weakly supervised object boundaries can reach the full supervision quality.

SBD: class-specific object boundaries

Family	Method	mF	mAP
Other	GT	28	21
SE	Hariharan et al.	39	32
	SB(SBD) orig.	43	37
	Det. + SE(SBD)	51	45
	SB(SeSe \wedge BBs)	40	34
Weakly supervised	SB(MCG \wedge BBs)	42	35
	Det. + SE(SeSe \wedge BBs)	48	42
	Det. + SE(MCG \wedge BBs)	51	45
	HED(SBD)	44	41
HED	GT	44	41
	Det. + HED(SBD)	49	45
	HED(cons. MCG \wedge BBs)	41	37
	HED(cons. S&G \wedge BBs)	44	39
Weakly supervised	Det. + HED(cons. MCG \wedge BBs)	48	44
	Det. + HED(cons. S&G \wedge BBs)	52	47

[Hariharan et al., ICCV'11] [SBD orig., Uijlings et al., CVPR'15]

While training an object detector one can also get high quality object boundary detector for free!
