**TARGET**
In this course you get to know elaborate tools to shape your scientific presentations. Science is mostly production of high quality data and conclusions. **TOPICS**
The aim of this course is to provide PhD students with an opportunity to build their understanding, skills and confidence in presentation of talks and posters. Special emphasis is put on the key message, introduction and conclusions, abstracts, data visualization, interruptions, body language, voice, confidence, verbal and nonverbal communication, and questions from the audience.
