EMBO Laboratory Leadership Course

TARGET GROUP
Postdocs
Postdocs (advanced) Research Group Leaders

TARGET
The aim of this seminar is to explore with attendees their own approach to leadership – and the approaches of the other participants – and use this insight to define for each individual how they want to lead and manage their research groups or other teams. The course also provides insight into how teams work best together and how to identify and resolve barriers to the efficient operation of teams.

TOPICS
Throughout the course, the trainers provide tools, techniques and insight tailored specifically to the laboratory/research setting for the management of teams, good communication, healthy resolution of conflict and the management of workloads and responsibilities. The course content can be tailored to the needs of the participants, though if this involves the development of additional content then an additional fee applies.

TRAINER
EMBO Laboratory Leadership Course

PERSON IN CHARGE
Dr. Christiane Haupt  christiane.haupt@gv.mpg.de
