Good scientific practice

TARGET GROUP
Doctoral Researchers

TARGET
In public, „good scientific practice“ is often connected with cases of plagiarism when it comes to dissertations.

TOPICS
However, the important topic covers a substantially wider spectrum of scientific conduct: Dealing with data (including checking, recording, ownership and storage), the publishing process and authorship, responsible supervision, academic cooperation, confirmation bias, conflicts of interest and dealing with conflicts. Inappropriate academic behaviour includes inventing or faking data, violating intellectual property (theft of ideas or plagiarism), and sabotaging the research of others.
