

Supervising PhD Students

TARGET GROUP	Postdocs, Group Leaders, Research Group Leaders	
TARGET	In this course, we will deal with the different roles concerning the leadership and supervision of PhD students. We will approach the question of what good supervision should look like in order to advance the students' research skills.	
TOPICS	When young scientists encounter their first thesis supervisions, they often face many questions and challenges. What is my role as a supervisor? What can I expect from my PhD students? What is the right balance between independence and guidance for each student? How to give feedback efficiently and effectively? This workshop will give you the opportunity to discuss these questions and to reflect on your experiences with the other participants in order to find your individual way of successful thesis supervision.
